

### Express Review Demo

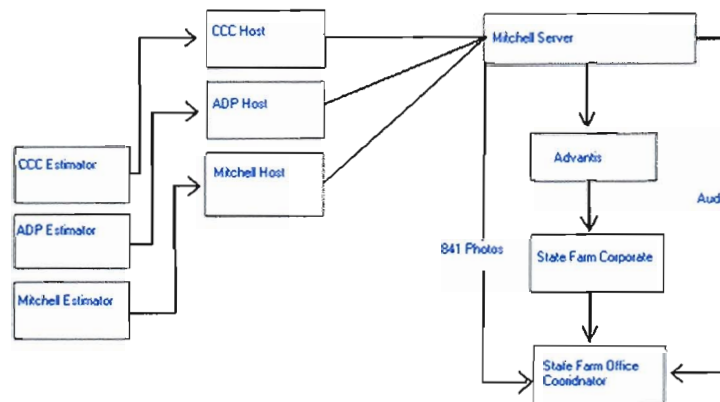

- Auditing tool
  - Steve indicated possible interest by State Farm (Service First)
- Focus – Claim cost – Productivity

### Goals

- Identify files to review
- Realtime review of 100% of claims
- Electronic payment processing

Client Server – Auditing takes place on Mitchell server / security / data stored here

- Upfront, each vendor uses their own host systems
- Future, have only one product

State Farm Involved . or direct working with the other vendors

- The 841's would be sent by the other vendors into Mitchell; Mitchell would reverse translate these into print images.
- Phase Two – Put this processing on State Farm box "significant effort"
  - EFT
    - File kicked off to State Farm daily to indicate estimates which passed review criteria. Automatically have SF generate payments on these examples.
